

Congress of the United States
Washington, DC 20515

October 8, 2025

Martin J. Lyons Jr.
President and CEO
Ameren Corporation
1901 Chouteau Avenue
St. Louis, MO 63103

Dear Mr. Lyons:

We write to urge you to suspend all utility shutoffs imposed on federal workers who are involuntarily furloughed without pay due to the ongoing government shutdown. Without their paycheck, federal workers are at risk of having their electricity, water, and broadband services terminated due to temporary inability to pay. The families you serve must have uninterrupted access to these essential public utilities.

These dedicated public servants contribute to our communities daily by inspecting our food and water, discovering cures for diseases, maintaining our parks, processing retirement benefits, caring for our veterans, and so much more. These civil servants have nothing to do with the ongoing political and policy disputes that have brought us to the government shutdown, but they will feel the acute impact of the loss of their paycheck.

A prolonged shutdown could place federal workers temporarily unable to pay their utility bills. Research shows that financially strained households tend to forgo paying for other essential needs, such as food and health care, in order to avoid utility shutoffs.¹ Moreover, if a federal worker faces a utility shutoff, they are more likely to be exposed to dangerous conditions in their home due to a lack of safe temperature, drinking water, or broadband connectivity.²

Suspending utility shutoffs for federal workers during a government shutdown is in line with statutory protections across the country. Over two-thirds of the states have statutes on the books to protect vulnerable populations from utility shutoffs.³ In Maryland specifically, state law prohibits public utilities from shutting off service to involuntarily furloughed federal workers.⁴

However, not all states or localities have such protections and federal workers impacted by the government shutdown live in every corner of our country, including in your service areas. As of

⁴ Md. Code, Public Utilities § 7-307.4.

<https://mgaleg.maryland.gov/mgaweb/Laws/StatuteText?article=gpu§ion=7-307.4>

July 1, 2025, there are over 2.2 million federal civilian workers,⁵ with at least 10,000 in 41 out of 50 states and at least 1,000 in each Congressional district.⁶

Due to the Government Employee Fair Treatment Act of 2019, affected federal employees will receive backpay after the shutdown concludes and at that time will be able to address any outstanding debts. Therefore, we urge you to forbear the collection of utility payments, late fees, interest accrual, or other fee collection for federal workers until their pay resumes.

When households are afforded utility disconnection protections, studies show that they are more likely to meet their basic expenses and less likely to rely on social networks and government agencies for assistance with their bills.⁷ By undertaking this small but meaningful action during a government shutdown, you can ensure that federal workers are not punished.

Our patriotic, merit-based civil servants work on behalf of the American people every day, delivering essential public services for our country. They should not have to bear the brunt of a political dispute they have nothing to do with. While we will continue to do everything in our power to swiftly reopen the government, we urge you to support our federal workers and their families during this challenging time.

Sincerely,

Chris Van Hollen

Research shows that financially strained households tend to forgo paying for other essential needs, such as food and health care, in order to avoid utility shutoffs.¹ Moreover, if a federal worker faces a utility shutoff, they are more likely to be exposed to dangerous conditions in their home due to a lack of safe temperature, drinking water, or broadband connectivity.²

Suspending utility shutoffs for federal workers during a government shutdown is in line with statutory protections across the country. Over two-thirds of the states have statutes on the books to protect vulnerable populations from utility shutoffs.³ In Maryland specifically, state law prohibits public utilities from shutting off service to involuntarily furloughed federal workers.⁴

However, not all states or localities have such protections and federal workers impacted by the government shutdown live in every corner of our country, including in your service areas. As of

⁴ Md. Code, Public Utilities § 7-307.4.

<https://mgaleg.maryland.gov/mgaweb/Laws/StatuteText?article=gpu§ion=7-307.4>

July 1, 2025, there are over 2.2 million federal civilian workers,⁵ with at least 10,000 in 41 out of 50 states and at least 1,000 in each Congressional district.⁶

Due to the Government Employee Fair Treatment Act of 2019, affected federal employees will receive backpay after the shutdown concludes and at that time will be able to address any outstanding debts. Therefore, we urge you to forbear the collection of utility payments, late fees, interest accrual, or other fee collection for federal workers until their pay resumes.

When households are afforded utility disconnection protections, studies show that they are more likely to meet their basic expenses and less likely to rely on social networks and government agencies for assistance with their bills.⁷ By undertaking this small but meaningful action during a government shutdown, you can ensure that federal workers are not punished.

Our patriotic, merit-based civil servants work on behalf of the American people every day, delivering essential public services for our country. They should not have to bear the brunt of a political dispute they have nothing to do with. While we will continue to do everything in our power to swiftly reopen the government, we urge you to support our federal workers and their families during this challenging time.

Chris Winfrey
President and CEO
Charter Communications
400 Washington Blvd.
Stamford, CT 06902

Dear Mr. Winfrey:

We write to urge you to suspend all utility shutoffs imposed on federal workers who are involuntarily furloughed without pay due to the ongoing government shutdown. Without their paycheck, federal workers are at risk of having their electricity, water, and broadband services terminated due to temporary inability to pay. The families you serve must have uninterrupted access to these essential public utilities.

These dedicated public servants contribute to our communities daily by inspecting our food and water, discovering cures for diseases, maintaining our parks, processing retirement benefits, caring for our veterans, and so much more. These civil servants have nothing to do with the ongoing political and policy disputes that have brought us to the government shutdown, but they will feel the acute impact of the loss of their paycheck.

A prolonged shutdown could place federal workers temporarily unable to pay their utility bills. Research shows that financially strained households tend to forgo paying for other essential needs, such as food and health care, in order to avoid utility shutoffs.¹ Moreover, if a federal worker faces a utility shutoff, they are more likely to be exposed to dangerous conditions in their home due to a lack of safe temperature, drinking water, or broadband connectivity.²

Suspending utility shutoffs for federal workers during a government shutdown is in line with statutory protections across the country. ⁴ Md. Code, Public Utilities § 7-307.4.

<https://mgaleg.maryland.gov/mgaweb/Laws/StatuteText?article=gpu§ion=7-307.4>

July 1, 2025, there are over 2.2 million federal civilian workers,⁵ with at least 10,000 in 41 out of 50 states and at least 1,000 in each Congressional district.⁶

Due to the Government Employee Fair Treatment Act of 2019, affected federal employees will receive backpay after the shutdown concludes and at that time will be able to address any outstanding debts. Therefore, we urge you to forbear the collection of utility payments, late fees, interest accrual, or other fee collection for federal workers until their pay resumes.

When households are afforded utility disconnection protections, studies show that they are more likely to meet their basic expenses and less likely to rely on social networks and government agencies for assistance with their bills.⁷ By undertaking this small but meaningful action during a government shutdown, you can ensure that federal workers are not punished.

Our patriotic, merit-based civil servants work on behalf of the American people every day, delivering essential public services for our country. They should not have to bear the brunt of a political dispute they have nothing to do with. While we will continue to do everything in our power to swiftly reopen the government, we urge you to support our federal workers and their families during this challenging time.

Andrew Marsh
Chair and CEO
Entergy Corporation
639 Loyola Ave
New Orleans, Louisiana 70113

Dear Mr. Marsh:

We write to urge you to suspend all utility shutoffs imposed on federal workers who are involuntarily furloughed without pay due to the ongoing government shutdown. Without their paycheck, federal workers are at risk of having their electricity, water, and broadband services terminated due to temporary inability to pay. The families you serve must have uninterrupted access to these essential public utilities.

These dedicated public servants contribute to our communities daily by inspecting our food and water, discovering cures for diseases, maintaining our parks, processing retirement benefits, caring for our veterans, and so much more. These civil servants have nothing to do with the ongoing political and policy disputes that have brought us to the government shutdown, but they will feel the acute impact of the loss of their paycheck.

A prolonged shutdown could place federal workers temporarily unable to pay their utility bills. Research shows that financially strained households tend to forgo paying for other essential needs, such as food and health care, in order to avoid utility shutoffs.¹ Moreover, if a federal worker faces a utility shutoff, they are more likely to be exposed to dangerous conditions in their home due to a lack of safe temperature, drinking water, or broadband connectivity.²

Suspending utility shutoffs for federal workers during a government shutdown is in line with statutory protections across the country. Over two-thirds of the states have statutes on the books to protect vulnerable populations from utility shutoffs.³ In Maryland specifically, state law prohibits public utilities from shutting off service to involuntarily furloughed federal workers.⁴

However, not all states or localities have such protections and federal workers impacted by the government shutdown live in every corner of our country, including in your service areas. As of

July 1, 2025, there are over 2.2 million federal civilian workers,⁵ with at least 10,000 in 41 out of 50 states and at least 1,000 in each Congressional district.⁶

Due to the Government Employee Fair Treatment Act of 2019, affected federal employees will receive backpay after the shutdown concludes and at that time will be able to address any outstanding debts. Therefore, we urge you to forbear the collection of utility payments, late fees, interest accrual, or other fee collection for federal workers until their pay resumes.

When households are afforded utility disconnection protections, studies show that they are more likely to meet their basic expenses and less likely to rely on social networks and government agencies for assistance with their bills.⁷ By undertaking this small but meaningful action during a government shutdown, you can ensure that federal workers are not punished.

Our patriotic, merit-based civil servants work on behalf of the American people every day, delivering essential public services for our country. They should not have to bear the brunt of a political dispute they have nothing to do with. While we will continue to do everything in our power to swiftly reopen the government, we urge you to support our federal workers and their families during this challenging time.

Vincent Sorgi
President and CEO
PPL Corporation
645 Hamilton Street
Allentown, PA 18101

Dear Mr. Sorgi:

We write to urge you to suspend all utility shutoffs imposed on federal workers who are involuntarily furloughed without pay due to the ongoing government shutdown. Without their paycheck, federal workers are at risk of having their electricity, water, and broadband services terminated due to temporary inability to pay. The families you serve must have uninterrupted access to these essential public utilities.

These dedicated public servants contribute to our communities daily by inspecting our food and water, discovering cures for diseases, maintaining our parks, processing retirement benefits, caring for our veterans, and so much more. These civil servants have nothing to do with the ongoing political and policy disputes that have brought us to the government shutdown, but they will feel the acute impact of the loss of their paycheck.

A prolonged shutdown could place federal workers temporarily unable to pay their utility bills. Research shows that financially strained households tend to forgo paying for other essential needs, such as food and health care, in order to avoid utility shutoffs.¹ Moreover, if a federal worker faces a utility shutoff, they are more likely to be exposed to dangerous conditions in their home due to a lack of safe temperature, drinking water, or broadband connectivity.²

Suspending utility shutoffs for federal workers during a government shutdown is in line with statutory protections across the country. Over two-thirds of the states have statutes on the books to protect vulnerable populations from utility shutoffs.³ In Maryland specifically, state law prohibits public utilities from shutting off service to involuntarily furloughed federal workers.⁴

However, not all states or localities have such protections and federal workers impacted by the government shutdown live in every corner of our country, including in your service areas. As of

Washington, DC 20515

October 8, 2025

Robert Frenzel
Chair, President and CEO
Xcel Energy Inc.
414 Nicollet Mall
Minneapolis, MN 55401

Dear Mr. Frenzel:

We write to urge you to suspend all utility shutoffs imposed on federal workers who are involuntarily furloughed without pay due to the ongoing government shutdown. Without their paycheck, federal workers are at risk of having their electricity, water, and broadband services terminated due to temporary inability to pay. The families you serve must have uninterrupted access to these essential public utilities.

These dedicated public servants contribute to our communities daily by inspecting our food and water, discovering cures for diseases, maintaining our parks, processing retirement benefits, caring for our veterans, and so much more. These civil servants have nothing to do with the ongoing political and policy disputes that have brought us to the government shutdown, but they will feel the acute impact of the loss of their paycheck.

A prolonged shutdown could place federal workers temporarily unable to pay their utility bills. Research shows that financially strained households tend to forgo paying for other essential needs, such as food and health care, in order to avoid utility shutoffs.¹ Moreover, if a federal worker faces a utility shutoff, they are more likely to be exposed to dangerous conditions in their home due to a lack of safe temperature, drinking water, or broadband connectivity.²

Suspending utility shutoffs for federal workers during a government shutdown is in line with statutory protections across the country. Over two-thirds of the states have statutes on the books to protect vulnerable populations from utility shutoffs.³ In Maryland specifically, state law prohibits public utilities from shutting off service to involuntarily furloughed federal workers.⁴

However, not all states or localities have such protections and federal workers impacted by the government shutdown live in every corner of our country, including in your service areas. As of

⁴ Md. Code, Public Utilities § 7-307.4.

<https://mgaleg.maryland.gov/mgaweb/Laws/StatuteText?article=gpu§ion=7-307.4>

July 1, 2025, there are over 2.2 million federal civilian workers,⁵ with at least 10,000 in 41 out of 50 states and at least 1,000 in each Congressional district.⁶

Due to the Government Employee Fair Treatment Act of 2019, affected federal employees will receive backpay after the shutdown concludes and at that time will be able to address any outstanding debts. Therefore, we urge you to forbear the collection of utility payments, late fees, interest accrual, or other fee collection for federal workers until their pay resumes.

When households are afforded utility disconnection protections, studies show that they are more likely to meet their basic expenses and less likely to rely on social networks and government agencies for assistance with their bills.⁷ By undertaking this small but meaningful action during a government shutdown, you can ensure that federal workers are not punished.

Our patriotic, merit-based civil servants work on behalf of the American people every day, delivering essential public services for our country. They should not have to bear the brunt of a political dispute they have nothing to do with. While we will continue to do everything in our power to swiftly reopen the government, we urge you to support our federal workers and their families during this challenging time.

Sincerely,

Chris Van Hollen
